

Cloud Finder: Your Quick Access to the Top 10 Cloud Services

Cloud Finder is a lightweight, clean, and efficient Chrome Extension designed to give you **one-click access** to the most popular cloud storage providers. Forget browsing through bookmarks or typing URLs—your favorite cloud service is now right in your browser toolbar.

Developed by a developer tired of managing multiple cloud bookmarks, Cloud Finder brings a sleek, intuitive experience directly into your workflow.

Key Features

 **One-Click Speed:** Immediately jump to your chosen cloud platform (Google Drive, Dropbox, OneDrive, MEGA, etc.) in a new tab with a single click on the popup icon.

 **Clean Interface:** Utilizes a modern, responsive design style (inspired by **Glassmorphism**) ensuring readability and visual appeal on all screen sizes. See the logos clearly and select your service instantly.

 **Maximum Privacy:** This extension operates with the **minimal required permission (activeTab)** and does **not** track your usage, collect personal data, store cookies, or access your browsing history. Your data stays private and local to your browser.

 **Zero Configuration:** Install and use immediately. There are no settings, no accounts, and no complex setup steps required.

Cloud Services Included (Top 10)

The following services are included in the compact list:

- Google Drive
- OneDrive
- iCloud
- Dropbox
- Box
- MEGA
- Amazon S3
- MediaFire
- pCloud
- Sync.com

Usage

1. Install the **Cloud Finder** extension from the Chrome Web Store.
2. Click the Cloud Finder icon (the  symbol) in your browser toolbar.
3. Select the cloud service you want to open.
4. The service opens instantly in a new tab.

Permissions Explained

- **activeTab:** This minimal permission is requested only to allow the extension to open a new tab (chrome.tabs.create) when you click a link. It does **not** grant access to the content of any website you are currently viewing.

Support & Open Source

This project is open-source and maintained on GitHub. We welcome feedback, bug reports, and suggestions.
